## Internal Risk Rating System <sup>(1)</sup>

<b>Risk Rating 1</b>	In the opinion of our Investment Adviser, investments in Risk Rating 1 involve the least amount of risk relative to our initial cost basis at the time of origination or acquisition. Risk Rating 1 investment performance is above our initial underwriting expectations and the business trends and risk factors are generally favorable, which may include the performance of the portfolio company, or the likelihood of a potential exit.
<b>Risk Rating 2</b>	In the opinion of our Investment Adviser, investments in Risk Rating 2 involve a level of risk relative to our initial cost basis at the time of origination or acquisition. Risk Rating 2 investments are generally performing in line with our initial underwriting expectations and risk factors to ultimately recoup the cost of our principal investment are neutral to favorable. All new originated or acquired investments are initially included in Risk Rating 2.
<b>Risk Rating 3</b>	In the opinion of our Investment Adviser, investments in Risk Rating 3 indicate that the risk to our ability to recoup the initial cost basis at the time of origination or acquisition has increased materially since the origination or acquisition of the investment, such as declining financial performance and non-compliance with debt covenants; however, principal and interest payments are not more than 120 days past due.
<b>Risk Rating 4</b>	In the opinion of our Investment Adviser, investments in Risk Rating 4 involve a borrower performing substantially below expectations and indicate that the loan's risk has increased substantially since origination or acquisition. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. For Risk Rating 4 investments, it is anticipated that we will not recoup our initial cost basis and may realize a substantial loss of our initial cost basis at the time of origination or acquisition upon exit.

Dollar amounts shown in thousands, except as otherwise noted. Please see the Company's filings with the SEC for further details.

1. The Adviser's ratings will not constitute any rating of investments by a nationally recognized statistical rating organization or represent or reflect any third-party assessment of any of the Company's investments.
